Paper 2 Business Concepts 2

February/March 2024

MARK SCHEME

Maximum Mark: 60

<p>Published</p>

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the February/March 2024 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

This document consists of **30** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

PUBLISHED

**Social Science-Specific Marking Principles
(for point-based marking)**

1 Components using point-based marking:

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require n reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Guidance on using levels-based marking

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work **just** meets the level statement, award the lowest mark.
- L1, L2 etc. must be clearly annotated on the response at the point where the level is achieved.

Assessment objectives

AO1 Knowledge and understanding

Demonstrate knowledge and understanding of business concepts, terms and theories.

AO2 Application

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

AO3 Analysis

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

AO4 Evaluation

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

Question	Answer	Marks

	AO1 Knowledge and understanding									
	A niche market is a (small) section/part/subset of the market.									
	No further marks can be gained without knowledge and understanding									
AO2 Application										
A characteristic of a niche market (or niche marketing), such as:										
<ul style="list-style-type: none">• High quality/reputation• USP/clear focus/differentiated• High profit (margin)• Loyal customers• Low economies of scale/high production costs• High risk/often single product/'all eggs in one basket'• May be more vulnerable to change than a mass market• Easier for small business to enter the market (e.g. lower marketing costs)										
Example of a niche market (not a business that targets a niche market)										
Do not allow specialised/customised as APP										
Accept all valid responses.										

Question	Answer		Marks
1(b)(i)	Refer to Fig. 1.1 and other information. Calculate the margin of safety in February.		3
	Answer	Guidance	
	Formula to find margin of safety = actual output - break-even output (1) Read the break-even output correctly from break-even chart = 1000 units (1) OR 1400 – 1000 (2) OFR Answer = 400 (units) or 40% (3)	Award 3 marks for correct answer of 400 (with or without workings) Award 2 marks for correct answer 400 with dollar sign, e.g. \$400 as the margin of safety is not a financial value	

Question	Answer			Marks
1(b)(i)	Exemplar and annotations			
	Marks			
	3 marks	Correct answer 400 units or 400 or 40%	Working does not matter. Must be three ✓ to denote the three marks.	
	2 marks	One of the following: <ul style="list-style-type: none"> Correct presentation of numbers (1400 – 1000), but no correct answer Correct answer with incorrect units (i.e. \$400 or 400%) OR An incorrect answer with one mistake allowing OFR for final stage.	To award two marks, there must be <ul style="list-style-type: none"> Two ✓ and a ✗ OR <ul style="list-style-type: none"> One ✓, one ✗ and one OFR 	
	1 mark	One of the following: <ul style="list-style-type: none"> Correct formula Correct identification of the break-even point (1000) 	To award one mark, there must be: <ul style="list-style-type: none"> One ✓ and two ✗ 	
	0 marks	No creditable content.	To award zero marks, there must be <ul style="list-style-type: none"> One ✗ 	

Question	Answer		Marks	
1(b)(ii)	Explain <u>one</u> way that Zoe and Luis can use break-even analysis.		3	
	AO1 Knowledge and understanding 1 mark	AO2 Application 2 marks		
		2 marks Developed application of one relevant point to a business context.		
	1 mark Knowledge of one relevant point is used to answer the question.	1 mark Limited application of one relevant point to a business context.		
	0 marks No creditable response.	0 marks No creditable response.		
	Knowledge	Knowledge of a way to use break-even analysis		1 mark
	Explanation	Explanation of a way Luis could use break-even analysis		1 mark
	Context	Context linked to a way Luis could use break-even analysis		1 mark
	<i>No marks can be awarded without knowledge.</i>			
	Responses may include: AO1 Knowledge and understanding <ul style="list-style-type: none">To support decision making (i.e. pricing decisions, costing decisions)To calculate useful data (i.e. break-even level of output, margin of safety, profit/loss levels at levels of output) <i>Do not allow calculations that are needed to produce break even analysis (i.e. VC, FC, TR)</i> <ul style="list-style-type: none">To consider ‘what if’ scenarios,To forecast costs/pricing <i>No further marks can be gained without knowledge and understanding</i>			

Question	Answer	Marks
1(b)(ii)	<p>AO2 Application</p> <p>Explanation may include:</p> <ul style="list-style-type: none"> • To support decision making; for example Luis could use the break-even data to decide on an appropriate marketing mix • To calculate useful data; such as the level of output at which ZB will stop making a loss. • To consider 'what if' scenarios; for example the impact of changing factors of production • To forecast costs/pricing when the level of output changes <p>Context may include:</p> <ul style="list-style-type: none"> • Margin of safety of 400 (OFR based on answer to Q1(b)(i)) • Break-even level of output of 1000 (OFR based on answer to Q1(b)(i)) • Allow any correct identifications/calculations of the data in Fig 1.1 (i.e. FC = \$25 000, VC per unit = \$15, TR/P per unit = \$40 – <i>Note: some calculations depend upon the output</i>) • Business set up three years ago / in 2021 • Business has grown each year • Bags are made to order • ZB uses JIT • Lead time is five days • 50% growth in sales in February due to magazine advertising promotion. • Larger production team (due to sales growth) • Two supervisors recruited • 15 production employees • Supervisors given off-the-job training • Production employees paid a salary (fixed, direct cost) • Increased labour turnover recently • Recommendation to introduce performance-related pay • Luxury hand-made bags <p>Accept all valid responses.</p>	

Question	Answer				Marks
1(c)	Analyse <u>two</u> benefits to ZB of providing off-the-job training to the new supervisors.				8
	Level	AO1 Knowledge and understanding 2 marks	AO2 Application 2 marks	AO3 Analysis 4 marks	
	2			3–4 marks Developed analysis <ul style="list-style-type: none"> Developed analysis that identifies connections between causes, impacts and/or consequences of two points. Developed analysis that identifies connections between causes, impacts and/or consequences of one point. 	
	1	1–2 marks <ul style="list-style-type: none"> Knowledge of two relevant points is used to answer the question. Knowledge of one relevant point is used to answer the question. 	1–2 marks <ul style="list-style-type: none"> Application of two relevant points to a business context. Application of one relevant point to a business context. 	1–2 marks Limited analysis <ul style="list-style-type: none"> Limited analysis that identifies connections between causes, impacts and/or consequences of two points. Limited analysis that identifies connections between causes, impacts and/or consequences of one point. 	
	0	0 marks No creditable response.	0 marks No creditable response.	0 marks No creditable response.	
	Off-the-job training is training that takes place away from their place of work. Examples of off-the-job training include a college/university course, distance learning (mark only given if no other marks awarded).				

Question	Answer	Marks
1(c)	<p>Responses may include:</p> <p>AO1 Knowledge and understanding</p> <p>Benefits of off-the-job training include:</p> <ul style="list-style-type: none"> • Specialist/expert training / higher quality • Fewer interruptions / better concentration • Change of environment • Can lead to recognised qualifications • Less production interruptions / does not impact quality / can be done outside work hours • Can be safer / less risk/ allows practice/mistakes <p><i>Knowledge of a benefit must be specific to off-the-job training</i></p> <p>AO2 Application</p> <ul style="list-style-type: none"> • Sells products online / online retailer • Luxury hand-made bags • Made to customer's order • 15 employees • ZB works closely with its main supplier of raw materials • Operates a JIT inventory management system • ZB set up three years ago • ZB operates as a partnership • Growing demand following magazine advertising promotion in January • Labour turnover increasing <p>AO3 Analysis</p> <ul style="list-style-type: none"> • Specialist/expert/quality training; less waste in the business – higher profit. • Fewer interruptions / better concentration; supervisors may need less time to be trained, reducing costs – leading to higher profit. • Specialist equipment can be used; which may not be available in the business, so makes supervisors more productive – increased production and revenue. • Change of environment; may motivate workers making them more productive – increased products to sell and revenue. • Valuing employees; makes employees more loyal and less likely to leave the business – reducing recruitment costs. 	

PUBLISHED

Question	Answer	Marks
1(c)	<ul style="list-style-type: none"> • Can lead to recognised qualifications; which may motivate employees to work harder and be more productive – increases revenue. • Fewer production interruptions / does not impact quality; more products produced – decreases average costs. • Can be safer / less risk; less wastage, so lower costs – increased profit. <p>Accept all valid responses.</p>	

Question	Answer				Marks
1(d)	Evaluate whether ZB should introduce performance-related pay.				12
	Level	AO1 Knowledge and understanding 2 marks	AO2 Application 2 marks	AO3 Analysis 2 marks	AO4 Evaluation 6 marks
	3				5–6 marks Developed evaluation in context <ul style="list-style-type: none"> A developed judgement/conclusion is made in the business context. Developed evaluative comments which balance some key arguments in the business context.
	2	2 marks Developed knowledge of relevant key term(s) and/or factor(s) is used to answer the question.	2 marks Developed application of relevant point(s) to the business context.	2 marks Developed analysis that identifies connections between causes, impacts and/or consequences.	3–4 marks Developed evaluation <ul style="list-style-type: none"> A developed judgement/conclusion is made. Developed evaluative comments which balance some key arguments.
	1	1 mark Limited knowledge of relevant key term(s) and/or factor(s) is used to answer the question.	1 mark Limited application of relevant point(s) to the business context.	1 mark Limited analysis that identifies connections between causes, impacts and/or consequences.	1–2 marks Limited evaluation <ul style="list-style-type: none"> A judgement/conclusion is made with limited supporting comment/evidence. An attempt is made to balance the arguments.

	0	0 marks No creditable response.	0 marks No creditable response.	0 marks No creditable response.	
	Price skimming is a pricing strategy in which a firm charges a high initial price and then gradually lowers the price to attract more price-sensitive customers. The pricing strategy is usually used by a first mover who faces little to no competition.
