Paper 2 Data Response

March 2020

MARK SCHEME

Maximum Mark: 60

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the March 2020 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **15** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks																
1(a)(i)	Define the term ‘job production’ (line 1)	2																
	<table><tr><th>Knowledge</th><th>Marks</th></tr><tr><td>A correct definition</td><td>2</td></tr><tr><td>A partial, vague or unfocused definition</td><td>1</td></tr><tr><td>No credible content</td><td>0</td></tr></table>		Knowledge	Marks	A correct definition	2	A partial, vague or unfocused definition	1	No credible content	0								
	Knowledge		Marks															
	A correct definition		2															
	A partial, vague or unfocused definition		1															
	No credible content		0															
	A correct definition should cover the following:																	
	<ul style="list-style-type: none">• one by one/made individually/one at a time• for a specific customer/order/not repeated/high standard/custom work/skilled labour																	
	<table><tr><th>Exemplar</th><th>Rationale</th><th>Marks</th></tr><tr><td>A one off product for a specific customer</td><td>Both elements covered</td><td>2</td></tr><tr><td>An individual product designed to a specific customer requirement</td><td>Both elements covered</td><td>2</td></tr><tr><td>A customised product</td><td>An understanding of customisation (no expansion)</td><td>1</td></tr><tr><td>An individually designed product</td><td>Only one element of the flow identified</td><td>1</td></tr></table>		Exemplar	Rationale	Marks	A one off product for a specific customer	Both elements covered	2	An individual product designed to a specific customer requirement	Both elements covered	2	A customised product	An understanding of customisation (no expansion)	1	An individually designed product	Only one element of the flow identified	1	
	Exemplar		Rationale	Marks														
A one off product for a specific customer	Both elements covered	2																
An individual product designed to a specific customer requirement	Both elements covered	2																
A customised product	An understanding of customisation (no expansion)	1																
An individually designed product	Only one element of the flow identified	1																

Question	Answer	Marks																																	
1(a)(ii)	<p>Explain the term ‘opportunity cost’ (line 4)</p> <p>Award one mark for each point of explanation</p> <table> <tr> <th>Point</th><th>Explanation</th><th>Marks</th></tr> <tr> <td>C</td><td>Example or some other way of showing good understanding – e.g. Affordability, time issues, choice, scarcity</td><td>1</td></tr> <tr> <td>B</td><td>Understanding of foregone/not used</td><td>1</td></tr> <tr> <td>A</td><td>Understanding of the concept of ‘next best’</td><td>1</td></tr> </table> <p>Note: C mark can only be awarded if A and B marks have already been awarded</p> <table> <tr> <th>Exemplar</th><th>Rationale</th><th>Marks</th></tr> <tr> <td>Opportunity cost is the value of the next best option foregone, due to time or cost issues.</td><td>All three elements</td><td>3</td></tr> <tr> <td>The value of the second best option that is not chosen as it is not as good as the first.</td><td>All three elements</td><td>3</td></tr> <tr> <td>Opportunity cost is the value of the next best option foregone</td><td>A and B</td><td>2</td></tr> <tr> <td>The next best option foregone</td><td>A and B</td><td>2</td></tr> <tr> <td>A lost option</td><td>B</td><td>1</td></tr> <tr> <td>Using the best option only</td><td>NAQ</td><td>0</td></tr> </table>	Point	Explanation	Marks	C	Example or some other way of showing good understanding – e.g. Affordability, time issues, choice, scarcity	1	B	Understanding of foregone/not used	1	A	Understanding of the concept of ‘next best’	1	Exemplar	Rationale	Marks	Opportunity cost is the value of the next best option foregone, due to time or cost issues.	All three elements	3	The value of the second best option that is not chosen as it is not as good as the first.	All three elements	3	Opportunity cost is the value of the next best option foregone	A and B	2	The next best option foregone	A and B	2	A lost option	B	1	Using the best option only	NAQ	0	3

Knowledge and Application (4 marks)	Marks	Analysis and Evaluation (7 marks)	Marks																																		
		Justified evaluation based on arguments <i>in context</i>	7																																		
		Developed evaluation based on arguments <i>in context</i>	6																																		
		An evaluative statement based on arguments <i>in context</i>	5																																		
Understanding of two sources of finance <i>in context</i>	4	Developed argument of two or more external sources of finance <i>in context</i>	4																																		
Understanding of one source of finance <i>in context</i>	3	Developed argument of one external source of finance <i>in context</i>	3																																		
Knowledge of two sources of finance	2	Limited analysis of two sources of finance	2																																		
Knowledge of one source of finance	1	Limited analysis of one source of finance	1																																		
<p>Annotate the first source in the left hand margin and the second in the right hand margin. If more than two sources are attempted, mark the ones that would give the candidate the highest mark allocation.</p> <p>Contextual analysis likely to come from:</p> <ul style="list-style-type: none">• Bank overdraft as the costs are low and likely to be repaid in the short term• Bank loan as the capital investment of \$2k may be too high for an overdraft• Government start-up grant as he is setting up a new business and may create jobs <p>Evaluation is likely to come from:</p> <ul style="list-style-type: none">• Short and long term ambitions of Joe• Joe’s attitude to risk• Joe’s ability to persuade banks to lend him the start-up capital <p>ARA</p>
