MATHEMATICS 9709/52

Paper 5 Probability & Statistics 1

February/March 2024

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do not write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

This document has 16 pages. Any blank pages are indicated.

BLANK PAGE

ag contains 9 blue marbles and 3 red marbles. One marble is chosen at random from the bag. If marble is blue, it is replaced back into the bag. If this marble is red, it is not returned to the bag. And marble is now chosen at random from the bag.
Find the probability that both the marbles chosen are red. [1]
Find the probability that the first marble chosen is blue given that the second marble chosen is red. [3]
r- 1

a)	Sam makes 10 attempts at scoring goals.	
	Find the probability that Sam will score goals on fewer than 8 of these attempts.	[3]
b)	Find the probability that Sam's first successful attempt will be before her 5th attempt	[2]
b)	Find the probability that Sam's first successful attempt will be before her 5th attempt.	[2]
b)	Find the probability that Sam's first successful attempt will be before her 5th attempt.	[2]
b)	Find the probability that Sam's first successful attempt will be before her 5th attempt.	[2]
b)	Find the probability that Sam's first successful attempt will be before her 5th attempt.	[2]

b)	Find the probability that Sam's first successful attempt will be before her 5th attempt.	[2]
b)	Find the probability that Sam's first successful attempt will be before her 5th attempt.	[2]
b)	Find the probability that Sam's first successful attempt will be before her 5th attempt.	[2]

Wei is going to keep making attempts until he scores 3 goals.					
Find the probability that he scores his third goal on his 7th attempt.					

[4]

3 The times taken, in minutes, by 150 students to complete a puzzle are summarised in the table.

Time taken (t minutes)	$0 \le t < 20$	$20 \leqslant t < 30$	$30 \leqslant t < 35$	$35 \leqslant t < 40$	40 ≤ <i>t</i> < 50	$50 \leqslant t < 70$
Frequency	8	23	35	52	20	12

(a) Draw a histogram to represent this information.
