Paper 5 Probability & Statistics 1

October/November 2020

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

A particular piece of music was played by 91 pianists and for each pianist, the number of incorrect notes was recorded. The results are summarised in the table.

| Number of incorrect notes | 1 – 5 | 6 – 10 | 11 – 20 | 21 – 40 | 41 – 70 |
|---------------------------|-------|--------|---------|---------|---------|
| Frequency | 10 | 5 | 26 | 32 | 18 |

(a) Draw a histogram to represent this information.

[5]

11

| (b) | State which class interval contains the lower quartile and which class interval contains the upper quartile. |
|--------------|--------------------------------------------------------------------------------------------------------------|
| | Hence find the greatest possible value of the interquartile range. [2] |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| (c) | Calculate an estimate for the mean number of incorrect notes. [3] |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
